The hydraulic powder press DORST DK 250 is an advanced machine designed to achieve high productivity while maintaining the tolerances of sintered parts. Thanks to its modular structure, it can be used for single or multi-level production, to which various automation solutions and additional functions can be added. The press has several features such as high mechanical and hydraulic rigidity, fast rotation speeds, low energy consumption and a special intelligent program generator (IPG) to support the size. In addition, it has small dimensions, maximum precision, a very rigid machine frame, centralized power flow and up to 2 upper and 2 lower gear levels. The press was completely renovated in 2009 and is still in daily use, working time 28975h. With a design force of 2500 kN, a top of 350 mm, a stroke of 70 mm, a positioning accuracy of  $\pm 0.01$  mm and a travel speed of up to 20 min<sup>-1</sup>, this press is an excellent choice for any industry that wants it. to optimize its production process.
